

MY FIRST WEBSITE

ADD SOME STYLE

Card 4 of 10

I'm Learning: **HTML/CSS**

The index.html home page looks a bit plain. You can change how it looks with CSS!

Ling Ling's website

This is my website.

Click on a link to visit a page.

- [My Family](#)
- [My Pets](#)

To this...

A stylized illustration of a panda character named Ling Ling, wearing a red headband with a white yin-yang symbol and the text 'CoderDojo'. The character is wearing a black mask and has a green collar.

Using CSS!

A CSS file contains the recipe for how the web page appears.

It's a separate file from the HTML file and it's linked to the HTML file like this:

```
<link type="text/css" rel="stylesheet" href="css/simple.css" />
```

- 1 Open the [index.html](#) file in your text editor and locate the link (it's the fifth line down). What this link is telling you is that the appearance of the page is controlled by a stylesheet named [simple.css](#) which is located in the [css](#) folder.
- 2 Go into the [css](#) folder and locate the file:
